DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5, 7-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Lim et al (US 2005/0115743).

Regarding claims 1-5, 7-10 Lim et al disclose a housing structure comprising: a first case 1 including a first inner wall 111 with an extension plate, wherein the length of the extension plate is h; and a second case 2 including a second inner wall 211 with a rib, wherein a notch defined between the rib and the second inner wall 211, and the depth the notch is h; wherein the extension plate engages the notch when the first case 1 is joined with the second case 2 wherein the first inner wall 111 includes an end surface and the extension plate extends from the end surface wherein the first case 1 further includes a first connecting portion, the second case 2 further includes a second connecting portion, and the first connecting portion is joined with the second connecting portion in a separable manner when the first case 1 is joined with the second case 2

wherein the first connecting portion integrally formed on the first inner wall 111 wherein the second connecting portion integrally formed on the second inner wall 211 wherein the extension plate integrally formed on the first inner wall 111 wherein the rib is integrally formed on the second inner wall 211 wherein the first case 1 is substantially provided with a uniform cross section wherein the second case 2 is substantially provided with a uniform cross section.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lim et al (US 2005/0115743) in view of Japan 339174).

Regarding claim 6 Lim et al disclose all the subject matter of the claimed invention except for the first connecting portion includes a positioning plate and a hole formed on the positioning plate. However Japan 174 discloses the first connecting portion includes a positioning plate and a hole formed on the positioning plate (see figure 11). Therefore, it would be obvious to one of ordinary skill to modify the first connecting portion includes a positioning plate and a hole formed on the positioning

plate of Japan 174's portion plate into Lim et al's portion plate in order to be good connection.

Allowable Subject Matter

3. Claims 11-19 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to show that a first case including a first inner wall with a Z-shaped end surface, wherein an extension plate is formed on the Z-shaped end surface.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ebert et al (US Pat. 6,247,078) teach computer interface for integrating a first computer to second computer.
